

Company Profile

PT. Hamilton Prima Indonesia

Get IFRS Compliance with Our Solution

About Our Company

PT. HAMILTON PRIMA INDONESIA

We all know about the new accounting standards, IFRS and the infamous complexity to implement and adopt it. At the end of the day, all companies in the world must comply with the new standards.

We are “Hamilton Team” in Indonesia, as part of Cognitus Asia, who developed a sophisticated engine to help organizations in the world to adopt IFRS with ease. Our solution is unique, we call it “Hamilton engine”, it is an integrated solution providing a complete solution for IFRS 9, IFRS 15, IFRS 16 and IFRS 17, their use cases and its mandatory quantitative disclosures. We dedicate our resources to help companies around the globe to implement the new accounting standards, IFRS.

Everything we do is about you, from business analysts, developers, project managers, solution architects and partners who know exactly how to implement IFRS for you, we prioritize what you need to get the best options and the optimized solutions.

Hamilton Engine

Here are some key benefits why Hamilton engine as a preferred choice:

Non-disruptive approach, minimum changes or no changes to the existing business process. Minimizing the impacts of IFRS implementation and adopting IFRS compliance with ease.

As SAP Premium Certified, our unique accounting and compliance add-on solution integrates with your existing SAP software ecosystem — without any additional software, hardware, system upgrades, or investments.

Easy to implement, all objects are configurable, which can be implemented in short time, including all IFRS quantitative disclosure requirements. It can go-live as soon as business data is ready.

Easy to use, you'll love that Hamilton is really easy to use and to navigate, natively integrated with SAP ECC or SAP S/4 HANA, which makes integrating with your existing G/L and A/P accounts a breeze.

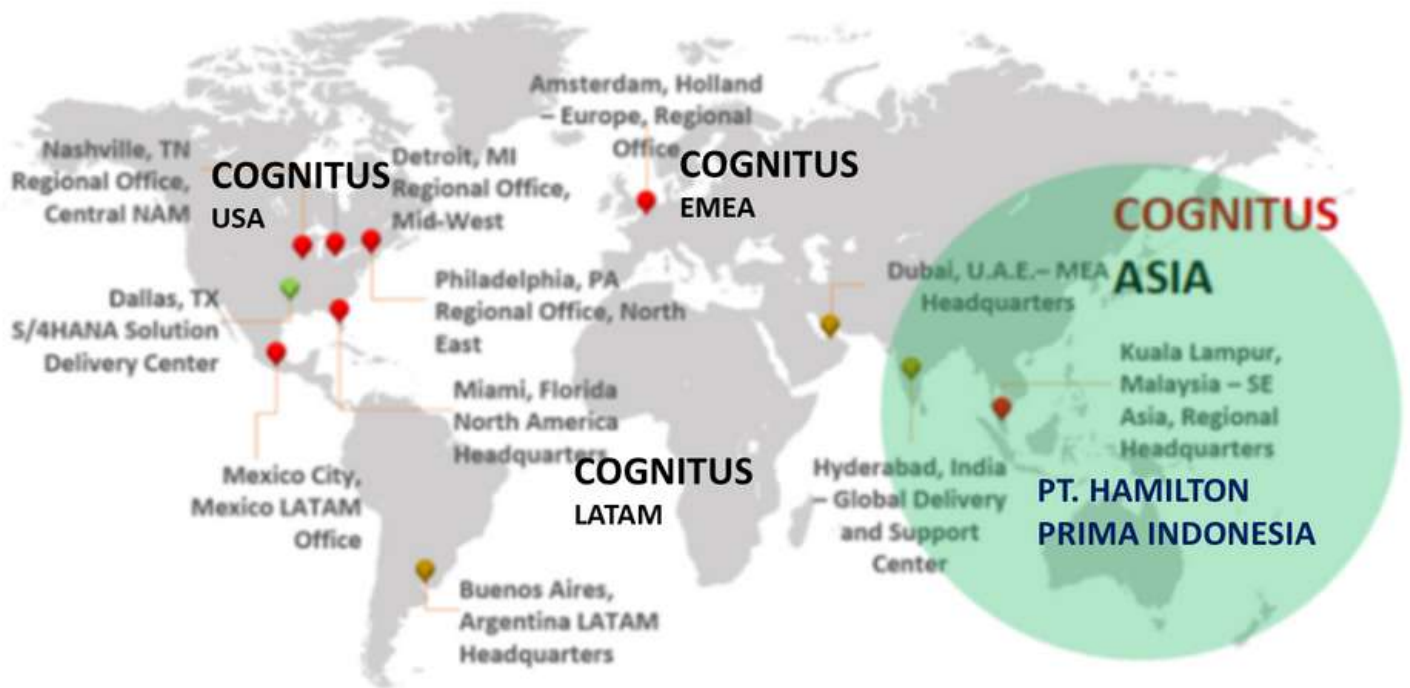

It is one stop solution for IFRS 9, IFRS 15, IFRS 16 and IFRS 17, also adaptable to any future requirements, including any accounting automation requirement in the future.

Total cost of ownership (TCO) is arguably the lowest in the market for IFRS solution.

Global Support

Other Portfolios

As part of global strategy,
we are expanding our services in Indonesia.

BLOCKCHAIN DEVELOPMENT FOR SUPPLY CHAIN AND IFRS

- New technologies are presenting promising opportunities for improvement across the supply chain. Blockchain can enable more transparent and accurate end-to-end tracking in the supply chain: Individuals or organizations can digitize their physical or intangible assets and create a decentralized immutable record of all transactions, making it possible to track assets end-to-end.
- Using blockchain and its derivative technology like smart contract, we extend the application of blockchain to enable transparent compliance and improve audit trail and security of the business transactions.
- This blockchain technology applied to the Leasebook, the first blockchain application in the world for lease transactions, where user can act as lessee, lessor, or both and do lease transactions secured and with ease.

NON-SAP IFRS SOLUTION

- Hamilton π (pi) is a lite version, web-based IFRS solution for small to medium business. Customers without SAP can still benefit the IFRS solution from Hamilton technology.

S/4HANA FULL LIFECYCLE IMPLEMENTATIONS

- SAP S/4HANA On-Premise
- SAP S/4HANA Cloud Single Tenant (STE)
- SAP S/4HANA Cloud Multi-Tenant (MTE)

GALLOP – ACCELERATED IMPLEMENTATIONS

- ECC to S/4HANA Conversion Pilot and Deployment
- Intelligent Enterprise Qualified Partner Package
